

# Maatregelen voor bezoekers op de corona afdeling

---

## Engels

The Spaarne Gasthuis makes every effort to take care of a safe environment. We take measures to protect patients, visitors and employees against contamination with the COVID-19 virus. That is why a visit to the hospital is going to be different from usually.

You are visiting your loved one, who is being admitted in the COVID-19 department. The person you are going to visit is being nursed in isolation. This means that everybody who visits the department, including staff and visitors, have to wear protective clothing to prevent contagion. Keep in mind that the rules could differ, due to the number of patients in the department. Please call the department if you want to visit, this way you can fine-tune the visit. The phone number of the COVID department is: 023-2240338 (preferably call between 10:00-15:00).

Please note that visitors over the age of 13 have to wear a mouth mask inside the buildings of the Spaarne Gasthuis.

**Below you will find a visitor scheme and the associated measures:**

- Patients may receive 2 visitors per day for a maximum of 1 hour; This means:
  - 1 visitor between 15:00 – 17:00 and
  - 1 visitor between 18:00 – 20:00.
- Please adhere to the visiting times and do not arrive earlier than agreed.
- It is not possible to switch visitors halfway through a visiting period.
- All visitors first report to the reception in the central hall of the hospital.
- The visitor is not allowed to wear jewelry or a watch when he comes to visit.
- The visitor reports to the secretariat of the department. This is located in the elevator hall.
- Before the visitor enters the department, he receives a nose-mouth mask from the hospital. Your own non-medical nose mouth mask does not suffice and is therefore not allowed being carried. The visitor also receives a coat apron and disposable gloves.
- In the room: apply hand hygiene (wash hands/use hand alcohol).
- Outside the room: keep all protective equipment on until the before designated waste bins. Take off the apron and gloves (if you are wearing them) and put them in the waste bins intended for this purpose. Apply hand hygiene with hand alcohol.
- After undressing you either can get a new mask from the hospital or chose to wear you own mask while leaving the building.
- Use hand alcohol before entering the elevator.
- Please leave the hospital immediately after your visit via the main entrance. It is allowed to use the toilet in the central hall before going home after your visit.
